

## Week 10 Lab Report

### 1. What did you plan to do last week?

- Last week I wanted to work on making a more uniform UI.

### 2. What did you end up doing last week?

- I finished the UI for the main menu and game selection screen. It's pretty simple, but it took me a while to implement into Unity. I also wrote a couple scripts to include the functionality of menus and transitioning screens.

### 3. What do you plan to do this week?

- I need to finish working on the presentation in preparation for the final and add my documentation to the final project spec.
- If time permits I need to develop an additional screen for the game to show the score after a user finishes a game.
